is pleased to offer our

# Congratulations

On the first issue of

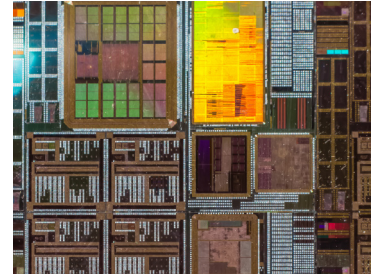

## PCB007 China Magazine

**MacDermid Enthone Electronics Solutions**, a division of MacDermid Performance Solutions, supplies innovative, environmentally sound products to a rapidly changing electronics supply chain. Working with our customers, we research, formulate and deliver specialty chemicals for the most complex printed circuit board designs. We specialize in the areas of PCB final finishes, PTH and microvia metallization, semiconductor plating and wafer level packaging chemistries. From mobile computing and wireless devices to automotive and military electronics, our products are an integral part of the worldwide electronics manufacturing industry.

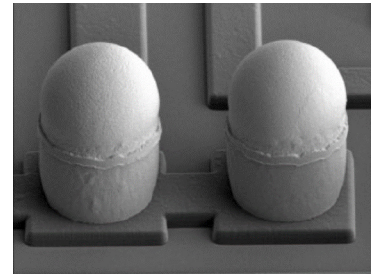

Since 1922, MacDermid Enthone Electronics Solutions has met our customers' most difficult manufacturing challenges with the world's most innovative discoveries and unsurpassed technical support.

There is no limit to what we can do for the electronics industry and for every one of our partners. We will never stop innovating.
